EN

No matter which products you choose from the CORTECO product portfolio, you always receive outstanding original quality. This high quality standard is directly linked to Freudenberg and characterises our comprehensive spare parts range. CORTECO offers more than 19,000 products and service kits to garages - among them leading brands such as the Simmerring® radial shaft seal. Our extensive product programme comprises Simmerrings, valve stem seals, flat gaskets and engine kits, vibration control technology such as engine mounts, pulleys and suspension mounts as well as cabin air filters and brake hoses.

DE

Für welches Produkt Sie sich aus der CORTECO-Produktfamilie auch entscheiden, Sie erhalten immer herausragende Original-Qualität. Dieser hohe Qualitätsstandard, dank unserer direkten Verbindung zu Freudenberg, kennzeichnet unser umfangreiches Ersatzteil-Sortiment. CORTECO bietet Werkstätten mehr als 19.000 Produkte und Service Kits - unter ihnen führende Marken wie z. B. den Simmerring® Radialwellendichtung. Unser breites Produktsortiment umfasst Simmerringe, Ventilschaftabdichtungen, Flachdichtungen und Motorsätze, Schwingungstechnik wie Motorlager, Riemenscheiben und Fahrwerkslager sowie Innenraumfilter und Bremsschläuche.

FR

Quelque soit le produit CORTECO que vous choisissiez, vous bénéficiez avant tout de la qualité d'origine issue de la technologie et de l'innovation Freudenberg. CORTECO offre plus de 19.000 références de qualité, parmi lesquelles des marques leaders comme les bagues d'étanchéité Simmerring®. Nos gammes comprennent des bagues d'étanchéité dynamique, des joints de queues de soupapes, des joints et kits de joints, des pièces antivibratoires pour moteur, transmission ou châssis, des filtres d'habitacle ou encore des flexibles de freins.

IT

Qualunque prodotto scegliate dalla gamma CORTECO, troverete sempre la necessaria qualità originale. La nostra gamma è caratterizzata da prodotti di alta qualità garantiti dal gruppo Freudenberg. CORTECO offre alle officine più di 19.000 parti di ricambio e kit riparazione, tra i quali importanti marchi depositati come Simmerring® e CORTECO per gli anelli di tenuta. Il nostro programma di vendita include anelli di tenuta, paraolio stelo valvola, guarnizioni piane e kit guarnizioni motore, supporti motore, pulegge, supporti sospensioni ed anche ricambi di servizio come filtri aria abitacolo e tubi freno.

# NEW AUTOMOTIVE GENERATION

## FREUDENBERG - INNOVATING TOGETHER

We are inspired by technology and innovation. Together with our customers and with our research partners, we develop leading-edge technologies, products, solutions and services. Having pioneered innovation throughout our history – from chrome tanning and the development of the Simmerring to sophisticated and high-tech medical devices – our company is an innovation champion. For us, striving together for solutions that support global sustainability is both our motivation as well as our concept for success. We live “Innovating Together” across business groups and world regions. This enables us to provide our customers with solutions and answers to tomorrow’s questions, today.

### Driving Balance

Vibracoustic is the global market leader in the field of automotive vibration control technology. And thus, supplies virtually every passenger vehicle and commercial vehicle manufacturer in the world with components that clearly and noticeably boost the comfort on board.

The global R&D network enables the engineers at Vibracoustic to develop unparalleled vibration damping technologies, gain new insights every day into manufacturing and materials engineering that are the key to superior products. Here, Vibracoustic never focuses on an individual component, but rather its effect on the vehicle as a whole.

**Corteco**, subsidiary of the Freudenberg group, is responsible for the distribution of automotive products to the independent aftermarket. With OE connections like this and a reputation for customer service and logistical support that's second to none, it's no wonder that Corteco is able to deliver so many appropriate solutions for so many different countries.

## FREUDENBERG – INNOVATING TOGETHER

Wir sind von Technologie und Innovation inspiriert: Gemeinsam mit unseren Kunden und unseren Forschungspartnern entwickeln wir führende Technologien, Produkte, Lösungen und Dienstleistungen. Von der Chromgerbung und der Entwicklung des Simmerrings bis hin zu komplexen, hochtechnologischen Medizingeräten: Unsere Firmenhistorie ist durch zukunftsweisende Innovationen geprägt. Als Meister der Innovation streben wir gemeinsam nach Lösungen, die die globale Nachhaltigkeit unterstützen. Das ist nicht nur unsere Motivation, sondern auch unser Erfolgskonzept. Wir leben das Motto „Innovating Together“ in allen Geschäftsbereichen und Regionen der Welt. So ist es uns möglich, unseren Kunden bereits heute Lösungen und Antworten auf die Fragen von morgen zu liefern.

### Fahrkomfort

Vibracoustic ist der globale Marktführer für Schwingungstechnik im Automobil. Als solcher beliefert er nahezu alle Pkw- und Nutzfahrzeughersteller weltweit mit Bauteilen, die den Komfort an Bord spürbar steigern.

In einem globalen F&E-Netzwerk entwickeln Vibracoustic Ingenieure Technologien zur Schwingungsdämpfung. Neue Erkenntnisse der Fertigungs- und Werkstofftechnik und moderne Berechnungsmethoden sind der Schlüssel für bessere Produkte. Dabei betrachtet Vibracoustic nie nur die einzelne Komponente, sondern deren Wirkung im Gesamtfahrzeug.

Die Freudenberg Tochter **Corteco** ist für den Vertrieb der Automobilprodukte an den freien Automobil-Ersatzteilmarkt zuständig. Mit OEM-Verbindungen wie dieser und einem Ruf für Kundenservice und logistische Unterstützung, die unübertroffen sind, wundert es nicht, dass Corteco so viele passende Lösungen für so viele verschiedene Länder anbieten kann.

## FREUDENBERG – INNOVATING TOGETHER

La technologie et l'innovation nous inspirent. Ensemble avec nos clients et nos partenaires de recherche, nous développons des technologies de pointe, des produits, des solutions et des services. Tout au long de notre histoire, du tannage au chrome aux appareils médicaux sophistiqués et de haute technologie, en passant par le développement des bagues Simmering, notre entreprise a toujours fait preuve d'innovation. Pour nous, chercher ensemble des solutions favorisant la durabilité mondiale est à la fois notre motivation et notre concept de réussite. Nous vivons "Innovating together" au travers de groupes de travail dans le monde entier. Cela nous permet de fournir aujourd'hui à nos clients des solutions et des réponses aux questions de demain.

### Confort de conduite

Vibracoustic est le leader mondial du marché dans le domaine du contrôle des vibrations automobiles. Et en tant que tel, il fournit presque tous les constructeurs de VL et VUL dans le monde en pièces qui améliorent nettement le confort à bord.

Un réseau mondial de Recherche et Développement permet aux ingénieurs de Vibracoustic de développer des technologies antivibratoires inégalées, d'acquérir de nouvelles perspectives chaque jour dans les techniques de conception et de fabrication des matériaux.

C'est la clé pour obtenir des produits de qualité supérieure. Dans le même esprit, Vibracoustic ne se concentre jamais sur un seul composant mais sur l'effet produit sur l'ensemble du véhicule.

**Corteco**, filiale du groupe Freudenberg, est responsable de la distribution des pièces automobiles sur le marché de la rechange indépendante. Muni de tels liens avec l'équipement d'origine, et d'un service client et logistique sans égal, il n'est pas étonnant que Corteco puisse fournir autant de solutions adaptées pour autant de pays différents.

## FREUDENBERG – INNOVATING TOGETHER

Ispirati dalla tecnologia e dall'innovazione, insieme con i nostri clienti e con i nostri partner, sviluppiamo tecnologie, prodotti, soluzioni e servizi all'avanguardia. L'innovazione ci accompagna fin dagli esordi – dalla conceria in cromo allo sviluppo del Simmerring® (anello di tenuta) fino ai sofisticati dispositivi medici hi-tech. Per questo, per noi, sviluppare soluzioni che supportano la sostenibilità globale è una filosofia ma anche la chiave per il successo. Viviamo "innovando insieme" ai Business Groups in tutte le regioni del mondo. Questo fa sì che già oggi, possiamo fornire ai nostri clienti soluzioni e risposte ai loro bisogni di domani.

### Comfort di guida

Vibracoustic è il leader mondiale, in campo automobilistico per la tecnologia del controllo delle vibrazioni. Da questa posizione, Vibracoustic fornisce virtualmente ogni produttore di autoveicoli e veicoli commerciali nel mondo con componenti che migliorano in modo evidente il comfort di guida.

La rete globale di ricerca e sviluppo consente agli ingegneri di Vibracoustic di sviluppare tecnologie di smorzamento delle vibrazioni senza pari, con costanti aggiornamenti in materia di ingegneria della produzione e dei materiali, le chiavi per fornire un prodotto superiore. Vibracoustic non si focalizza solamente sul singolo componente, ma anche sugli effetti che questo produce sull'intero veicolo.

**Corteco**, quale sussidiaria del gruppo Freudenberg, è responsabile della distribuzione nell'indipendente aftermarket per i prodotti automotive. Con un link con l'OE come questo, unito ad un servizio clienti ed una capacità logistica seconda a nessuno, non è difficile comprendere che Corteco è in grado di fornire soluzioni appropriate ad ogni specifica area.

A growing trend

# START-STOP SYSTEMS

## MAKING A CHANGE

Environmental considerations and a reduction in the combustion of precious fuels are crucial factors in the development of new eco-friendly technologies for the automotive sector.

Automatic start-stop systems are good examples, providing a 5 to 7 % improvement in fuel economy and a similar reduction of carbon dioxide emissions.

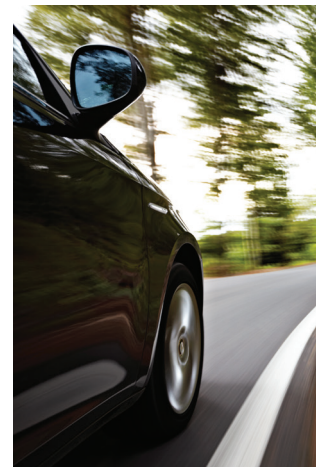

More than half of the cars currently produced are equipped with start-stop systems that reduce CO2 emissions and save fuel. The OE trend points upwards. By 2022, it is expected that start-stop systems will be fitted as standard on more than 82 % of the vehicles sold in Western Europe.

The vehicle comes to a standstill, the engine is stopped and then restarted after a brief period of time. It is a process that increases the vibrations and the strain throughout the accessory drive, via the crankshaft pulley.

**On average, an ordinary pulley will have to withstand up to 50,000 to 70,000 starts. A start-stop pulley on the other hand, will have to endure 500,000 to 700,000 starts.**

Developing pulleys that can withstand ten times as many starts without breaking or failing, poses enormous challenges. Extensive research, development and testing makes it possible to deliver the solutions.

Counterfeit parts are exposed to none of these and therefore cannot match OE requirements.

### THE CORTECO START-STOP RANGE

There are over 20,000 Vibration Control, Sealing and Filtration products and more than 1,410 of these are specifically for start-stop applications.

The Corteco range already includes:

- 50 Corteco start-stop PULLEYS covering over 4.5 million vehicles
- 11 Corteco start-stop PULLEY KITS including Pulleys and matching bolts

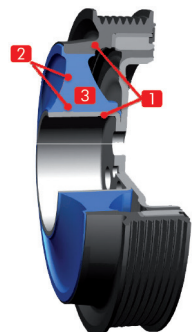

### STRONGER PARTS FOR A HIGHER DURABILITY

As the aftermarket distribution arm of the Freudenberg Group, Corteco is able to draw on the wealth of design and development resources available from a company renowned as one of the world's largest manufacturers of components for OE.

Transforming an ordinary pulley (TVD) into the perfect start-stop component is a complicated process. Some of the stages include:

- 1 Optimising construction by developing a stronger geometry between components
- 2 Conceiving new mounting and bonding processes specifically designed for metal and rubber parts - Enhancing the bonding characteristics through enlargement of the holding surfaces to improve isolation and extend durability
- 3 Developing new materials such as high temperature and performance elastomers (Nano-EPDM Technology)

Ein wachsender Trend

# START-STOPP-SYSTEME

## EINEN UNTERSCHIED MACHEN

Ökologische Aspekte, sowie die unnötige Verbrennung von wertvollem Benzin, waren für die Automobilindustrie maßgebliche Faktoren, um umweltfreundlichere Technologien zu entwickeln.

Eine dieser neuen Entwicklungen ist das automatische Start-Stopp System, welches den Benzinverbrauch um 5 bis 7 % reduziert, mit einem ähnlich Effekt bei Kohlendioxid-Emissionen.

Mehr als die Hälfte der derzeitig produzierten Autos sind mit einem Start-Stopp-System, welches den CO<sub>2</sub> Ausstoß reduziert und den Kraftstoffverbrauch senkt, ausgestattet - Tendenz steigend. Es wird erwartet, dass Start-Stopp-Systeme bis zum Jahr 2022 serienmäßig in mehr als 82 %, aller in Westeuropa verkauften Fahrzeuge, verbaut sind.

Wenn das Fahrzeug zum Stillstand kommt wird der Motor abgeschaltet und nach kurzer Zeit wieder gestartet. Dieser Vorgang erhöht die Vibration sowie die Belastung aller Teile, die mit der Riemenscheibe an der Kurbelwelle verbunden sind.

**Eine herkömmliche Riemenscheibe muss durchschnittlich 50.000 bis 70.000 Startvorgängen standhalten. Eine Start-Stopp Riemenscheibe muss hingegen 500.000 bis 700.000 Starts aushalten.**

Die Entwicklung von Motorlagern oder Riemenscheiben, welche der zehnfachen Anzahl an Starts standhalten ohne auszufallen, stellt eine immense Herausforderung dar. Jedoch machte eine intensive Forschung, Entwicklung und Prüfung es möglich dieses Problem zu lösen. Plagiate unterlagen keinem dieser drei Schritte und entsprechen demzufolge den OE Anforderungen nicht.

## DAS CORTECO START-STOPP-SORTIMENT

Corteco bietet über 20.000 Produkte im Bereich Schwingungsdämpfer, Dichtungen und Filtration, von denen mehr als 1.410 speziell für Start-Stopp-Applikationen sind.

Das Corteco Sortiment umfasst bereits:

- 50 Corteco Start-Stopp Riemenscheiben; decken den Bedarf von ca. 4,5 Millionen Fahrzeugen
- 11 Corteco Start-Stopp Riemenscheiben Sets, inklusive Riemenscheibe und passenden Schrauben

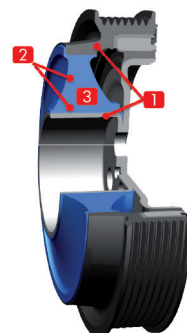

## STÄRKERE BAUTEILE FÜR EINE LÄNGERE LEBENSDAUER

Als Vertriebsgesellschaft für Ersatzteile der Freudenberg Gruppe, ist Corteco in der Lage auf eine Fülle an Gestaltungsmöglichkeiten und Entwicklungsressourcen zurückzugreifen, bezogen von einer Firma bekannt als einer der weltgrößten Hersteller von Bestandteilen für den OE-Bereich.

Eine herkömmliche Riemenscheibe Start-Stopp-fähig zu machen ist ein aufwendiger Prozess. Hierzu gehören einige Schritte wie:

- 1 Optimierung der Konstruktion durch eine verbesserte Geometrie der Komponenten
- 2 Entwicklung neuer Montage- und Klebprozesse, speziell für Gummi-Metallteile - Verbesserte Bindungseigenschaften führen, mittels einer vergrößerten Haftfläche, zu einer verbesserten Isolierung und einer längeren Lebensdauer
- 3 Das Entwickeln von neuen Materialien, wie temperaturbeständigen Hochleistungs-Elastomeren (Nano-EPDM Technologie)

Une tendance grandissante

# SYSTÈMES STOP & START

## APPORTER UN CHANGEMENT

Des considérations environnementales et une réduction de la combustion des précieux carburants sont des facteurs cruciaux dans le développement de nouvelles technologies écologiques pour le secteur automobile.

Les systèmes automatiques Stop & Start en sont un bon exemple en améliorant les économies de carburant de 5 à 7 % et en apportant une réduction équivalente d'émissions de dioxyde de carbone.

Plus de la moitié des véhicules fabriqués actuellement sont équipés d'un système Stop & Start qui réduit les émissions de CO<sub>2</sub> et économise le carburant. Et la tendance chez les constructeurs est à la hausse. D'ici 2022, on prévoit que les systèmes Stop & Start équiperont en série plus de 82 % des véhicules vendus en Europe de l'Ouest.

Le véhicule s'arrête, le moteur s'arrête lui aussi et redémarre peu de temps après. Ce processus augmente les vibrations et la tension sur l'entraînement des accessoires via la poulie de vilebrequin.

**En moyenne, une poulie ordinaire devra résister jusqu'à 50 000 voire 70 000 démarrages. Une poulie Stop & Start, en revanche, devra endurer 500 000 à 700 000 démarrages.**

Développer des supports moteurs ou des poulies capables de résister à dix fois plus de démarrage sans cassure ou rupture, est un énorme défi. Des travaux approfondis de recherche, de développement et d'essais permettent de fournir des solutions.

Les pièces contrefaites n'ont pas été soumises à ces contraintes et ne peuvent donc pas répondre aux exigences des constructeurs.

## LA GAMME STOP & START DE CORTECO

Il existe plus de 20 000 produits en contrôle des vibrations, en étanchéité et en filtration et plus de 1 410 d'entre eux sont spécialement conçus pour des applications Stop & Start.

La gamme Corteco inclut déjà :

- 50 POULIES Stop & Start couvrant plus de 4,5 millions de véhicules
- 11 KITS POULIES Stop & Start comprenant les poulies et les vis de fixation correspondantes

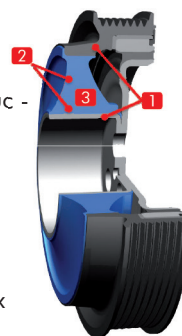

## DES PIÈCES PLUS RÉSISTANTES POUR UNE PLUS GRANDE DURABILITÉ

En tant que bras du groupe Freudenberg sur le marché de la distribution des pièces de rechange, Corteco profite de la richesse de conception et des ressources de développement d'une société reconnue comme l'un des plus grands fabricants au monde de pièces pour l'équipement d'origine.

Transformer une poulie ordinaire (Torsional Vibration Damper) en équipement parfait pour Stop & Start est un processus compliqué. Quelques-unes des étapes sont :

- 1 Optimiser le montage en développant une géométrie plus résistante entre les composants
- 2 Concevoir des techniques de fixation et d'adhésion spécifiques aux parties métalliques et caoutchouc - Accroître les caractéristiques d'adhésion par un élargissement des surfaces de maintien pour augmenter la durabilité
- 3 Développer de nouveaux matériaux - tels que les élastomères résistant aux températures élevées (technologie Nano-EPDM)

Un trend in crescita

# SISTEMI START&STOP

## UN CAMBIO DI ROTTA

Considerare l'impatto ambientale e ridurre il consumo di carburante sono due fattori chiave per lo sviluppo di nuove tecnologie automobilistiche eco-friendly.

I sistemi automatici Start&Stop ne sono un buon esempio, dal momento che permettono un miglioramento tra il 5 % e il 7 % dei consumi di carburante e similmente anche delle emissioni di CO<sub>2</sub>.

Più della metà delle automobili prodotte attualmente sono equipaggiate con un sistema Start&Stop che riduce le emissioni di CO<sub>2</sub> e ne migliora i consumi; questo trend è in costante crescita. Entro il 2022, si prevede che sistemi Start&Stop siano montati di primo impianto su oltre l'82 % degli autoveicoli venduti in Europa occidentale.

Quando il veicolo si ferma, il motore viene spento e riacceso al momento della partenza, dopo qualche istante. Questo è un processo che aumenta le vibrazioni e lo stress sulla cinghia servizi tramite la puleggia albero motore ed i supporti motore.

**In media, una puleggia e un supporto motore standard, devono sopportare tra le 50.000 e le 70.000 partenze a differenza di una puleggia e un supporto in un sistema Start&Stop che dovranno sopportarne tra le 500.000 e le 700.000.**

Sviluppare componenti che possano smorzare un numero di partenze dieci volte maggiore, senza danneggiarsi o rompersi, rappresenta una grande sfida, superata attraverso ricerche approfondite ed innumerevoli test. I componenti contraffatti non sono sottoposti a nessuno di questi processi quindi non soddisfano le caratteristiche richieste dall'OE.

### GAMMA START&STOP CORTECO

Una gamma composta da oltre 20.000 prodotti divisi tra controllo vibrazioni, tenute e filtrazione, 1410 dei quali specifici per applicazioni Start&Stop.

La gamma Corteco include:

- 50 PULEGGE Corteco Start&Stop che coprono oltre 4,5 milioni di veicoli
- 11 KIT PULEGGIA Corteco Start&Stop che includono puleggia e relativi bulloni

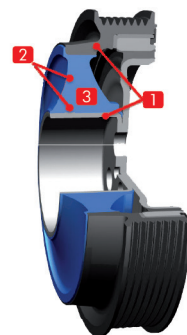

### ALTA RESISTENZA, LUNGA DURATA

In qualità di distributore aftermarket del gruppo Freudenberg, Corteco è in grado di attingere dalle risorse di un'azienda riconosciuta tra i maggiori costruttori e fornitori di componenti OE al mondo.

La trasformazione di una puleggia standard (TVD) in una puleggia ottimizzata Start&Stop è un processo complicato. Alcuni tra i processi sono:

- 1 Ottimizzazione costruttiva tramite lo sviluppo di una
  - geometria più equilibrata tra i componenti
- 2 Ideazione di nuovi processi di
  - adesione tra componenti di gomma e metallo, incrementando la forza legante tra le parti ed aumentando le superfici di contatto per ottenere migliore isolamento dalle vibrazioni e estendere la durata del prodotto
- 3 Sviluppo di nuovi e performanti
  - elastomeri resistenti ad alte temperature (Nano-EPDM Technology)
