DIFFERENT COLOR GUARANTEED QUALITY

Comparing the p.n. 12018929B with the corresponding OEM references it is possible to notice a difference in the color of the rubber. The original article is perfectly green, while the p.n. 12018929B appears brown spotted: the cause of this difference is dictated

by the smoke created by the oven during the vulcanization process.

Despite this aesthetic anomaly, we can guarantee that the functionality of the product is perfect and that the quality of the compound and its tolerances are satisfied.

The p.n. 12018929B is interchangeable with the OEM product.
