NEW DESIGN BETTER PERFORMANCES

The design of the new oil seal 12019078B has changed in size, shape and materials in order to ensure a better functionality:

- the height is now of 10.2 mm, instead of 13 mm;
- the new version is in FKM rubber instead in ACM rubber, in order to ensure better performance in terms of pressure and high temperature resistance;
- the old one was partially covered by rubber and the new one is completely covered by rubber, improving the static sealing area;
- the new component has a dust lip in v-lies, defining a better protection from dirt and dust.
